Quality manager	Panagiotis Lytrivis (ICCS)	23/12/2022
Project Coordinator	Angelos Amditis (ICCS)	23/12/2022

Executive Summary

An online collaboration platform allows a group of people to have access to documents, manage them and upload new ones that will then be available to their collaborators. In the EVENTS project, such a platform has been setup since the beginning of the project, based on the free-to-use platform "Redmine" [1]. It is functional since the beginning of the project, and more than 50 people from the partners already have access to its contents and are also able to contribute. In this document, the description of the platform functionalities and its contents at the moment of writing are included.

In Section 2, the Redmine platform is described in detail. In Section 3, the services of Redmine that are present in the EVENTS project are presented. Finally, in Section 4, final remarks are made with regard to this deliverable.
